

Flame Sensor

Harsha R

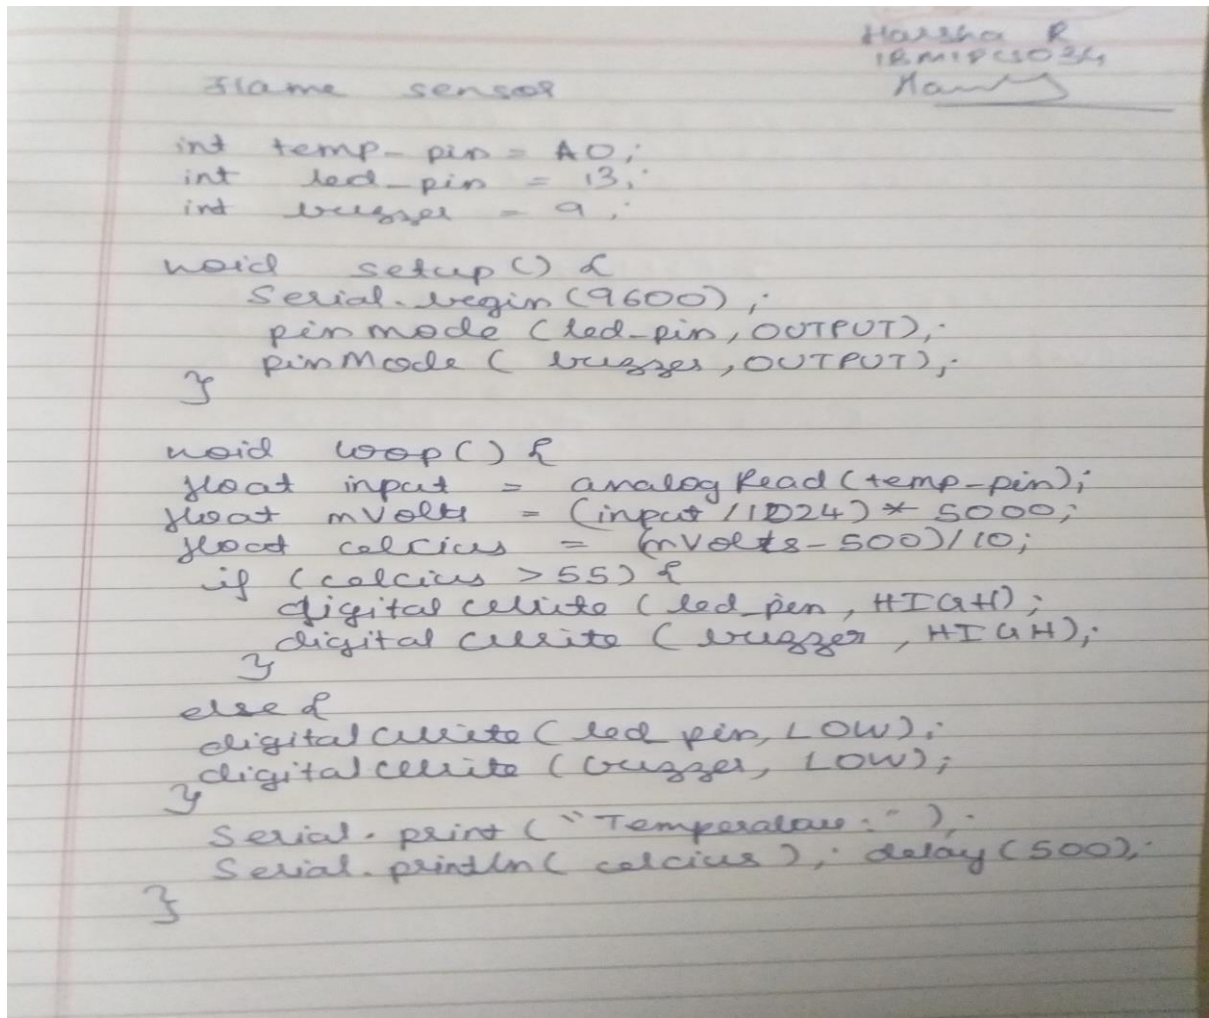

1BM18CS034

Aim : To detect and alert an instance of a fire.

Circuit Diagram

Handwritten Code

Code

```
int temp_pin = A0;

int led_pin = 13;

int buzzer = 9;

void setup()

{

  Serial.begin(9600);
```

```
pinMode(led_pin,OUTPUT);
    pinMode(buzzer,OUTPUT);
}

void loop()
{

    float input = analogRead(temp_pin);
    float mVolts = (input/1024.0)*5000;
    float celcius = (mVolts-500)/10;
    if(celcius>45){
        digitalWrite(led_pin,HIGH);
        digitalWrite(buzzer,HIGH);
    }
    else {
        digitalWrite(led_pin,LOW);
        digitalWrite(buzzer,LOW);
    }
    Serial.print("Temperature: ");
    Serial.println(celcius);
    delay(500);
}
```

Observation

In case of a fire, the led starts glowing and the buzzer starts ringing to alert about it.

Output
